Investing in Green and Just Transition for a New Sustainable Business as Usual Economy - BauNOW

OUR PROJECT

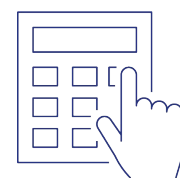

BauNOW project main objective is to improve the planning and implementing capacities of public and private stakeholders for financing of measures supporting the Green and Just Transition (GJT) to climate-neutral and resilient living areas. With new, integrated development practices and improved access to finances for GJT, both the public and private sector in the MED project areas will recognise the business and development potential of GJT, making it their new business as usual.
