

BACHELOR

FINANCE AND ACCOUNTING

IN COOPERATION WITH BOKU UNIVERSITY

Why this study program?

The Finance and Accounting study program, developed in collaboration with **BOKU University**, offers comprehensive theoretical and practical training in the fields of finance, accounting, and financial management.

The program is designed to respond to the demands of the labor market and contemporary developments in the economy and agribusiness.

Through this program, students develop skills in preparing budget plans, analyzing investments, and managing financial risk, using modern concepts and practices of finance and accounting.

Graduates are prepared for careers in financial institutions, businesses, public administration, and the agribusiness sector.

**Internationally
recognized degree**

Programme Description

The program provides academic training in finance and accounting by integrating knowledge from economics, management, and financial analysis. The credit structure ensures a balance between theory and practice, while some modules are delivered in English, strengthening students' academic and professional preparation.

Graduate Profile / Professional Profile

Graduates of the Finance and Accounting program are trained as professionals with theoretical, practical, and interdisciplinary skills in financial management, accounting, and economic analysis. They can pursue careers as:

- **Financial Specialists or Financial Managers** in private businesses, public institutions, and non-profit organizations;
- **Accountants or Auditors** in companies, banks, financial institutions, and government agencies;
- **Financial Analysts and Investment Consultants**, supporting strategic decision-making and economic planning;
- **Experts in Risk Management and Financial Budgeting** in various organizations, including the agribusiness sector.

Florinda Zherri

Lecturer at UBT

"This program inspired me to continue my academic path and to share the same values and knowledge with my students. Finance also provided me with practical knowledge and new perspectives on resource management."

Henri Ndreca

General Director of T-Blocks

"Studies in Finance and Accounting built the foundation of my leadership by equipping me with strategic thinking, analytical discipline, and a vision for innovation. As a leader, these competencies translate into sustainable decision-making and the continuous development of the business."

Fatmir Nikolli

Regional Director and Head of the Agriculture Segment (NOA, JSC)

"Studies in Finance and Accounting gave me the opportunity to lead with vision and to support the sustainable development of the agricultural sector at the regional level."

Esmeralda Doçi

Head of the General Accounting Sector, Social Insurance Institute

"Studies in this field built a strong professional foundation for me and the integrity needed to responsibly manage public finances and ensure transparency in administration."

Key Competencies Acquired

At the end of the program, students acquire competencies in:

- Advanced knowledge in finance and accounting for the agricultural sector and other economic sectors.
- Analytical skills and the use of modern methods and software for financial analysis and decision-making.
- Competence in financial reporting, risk management, and the application of accounting standards.
- Skills in financial planning, budgeting, and the development of investment projects in agriculture and agribusiness.
- Capacity to design economic policies and assess the financial, economic, and social impact of public programs and policies.
